# Seamless integration of flexible edgebanding

Winner **W4**  
handling systems

## The market demands

a change in manufacturing processes that enables companies **to accept the largest possible number of orders**. All whilst still maintaining high quality standards, increased productivity and fast, reliable delivery times.

## Biesse meets these requirements

with **technological solutions** that enhance and support technical expertise as well as process and material knowledge. **Winner W4** is a loading system that's fully integrated with single-sided edgebanding machines for the automatic management of panels waiting to be edgebanded.

- ✓ **A 25% increase in the productivity of the edgebanding machine.**
- ✓ **Easier material handling.**
- ✓ **Less risk of damaging the surface of delicate panels.**
- ✓ **Simple, user-friendly graphic interface.**

# Efficiency and simplicity

The need for just one operator means a 25% increase in the productivity of the edgeworking machine.

Winner W4 for the range of Biesse single-sided edgeworking machines.

Adapts perfectly to all the machines it supports, without any need for additional components.

Productivity of up to 600 pieces per shift.

Pick-up system for recirculating and unloading panels with 180° rotation. Automatic positioning via the dimension detection system.

The sensors for the detection of the panel render the machine completely independent.

The graphic interface is extremely user-friendly and simple, thanks to the smart-touch screen.
